I'm a 19 years old tech insightful Electrical and Electronics student with an Entry-level Web Developer. Also an avid tech enthusiast with a lifelong passion for learning something new and seeking to utilize my relevant problem-solving skills, and a strategic team player, traits that help me contribute better to the professional domain.

PROJECTS

Portfolio - [my-first-portfolio](#)

- A responsive website with an objective to show my personal information for all different view ports.
- The website was built using **HTML,CSS** and mainly **Javascript**.

To Do list

- A page made with an objective where the tasks of this todo are stored in the local storage of the browser so the tasks won't be lost after refreshing the page.
- The website was built using **HTML,CSS** and mainly **Javascript**.

Facebook login

- A facebook login button in react to get the users, email and picture. Then add it to the component state and render the data.
- The website is built using **React**.
